.NET Install – Standalone Workstation

*Questions? From your BS&A program, go to **Help>Contact Customer Support** and select **Request Support Phone Call** or **Email Support**. Or, you may call us at (855) 272-7638 and ask for the appropriate support department. Questions for our I.T. department may be submitted by phone (same number), or by emailing tech@bsasoftware.com.*

Purpose: These instructions are for use when the BS&A programs are being installed on a workstation for the first time, where a server or a data-store machine is not present. The database(s) will be installed on the same workstation as the program(s).

Both an orange SQL CD and a white BS&A Program CD will be installed. The orange SQL CD <u>must</u> be installed first.

Install the Orange SQL CD

Important: If you have been installing Windows updates, you should have both "Windows Installer" and "Microsoft .NET Framework" - both are prerequisites for the installation of SQL. <u>These instructions assume you do not</u>.

1. Go to a PC that will have the BS&A program(s) installed.

2. Insert the orange SQL CD.

    The CD automatically runs and presents the InstallShield Wizard (if it detects that "Windows Installer" and/or "Microsoft .NET Framework" have been installed, they will not appear in the list).
3. Click [Install].
4. After "Windows Installer" has installed, you are prompted to reboot. Click [Yes].
5. After the reboot, the InstallShield Wizard reappears. Click [Install].

6. After "Microsoft .NET Framework" has installed, you are prompted to reboot. Click [Yes].
7. After the reboot, the InstallShield Wizard reappears. Click [Install] to install "Microsoft SQL Server 2008".

    As it begins to install, you will see several screens, among them the two pictured. **DO NOT CLOSE ANY OF THE SCREENS**.

BS&A
SOFTWARE
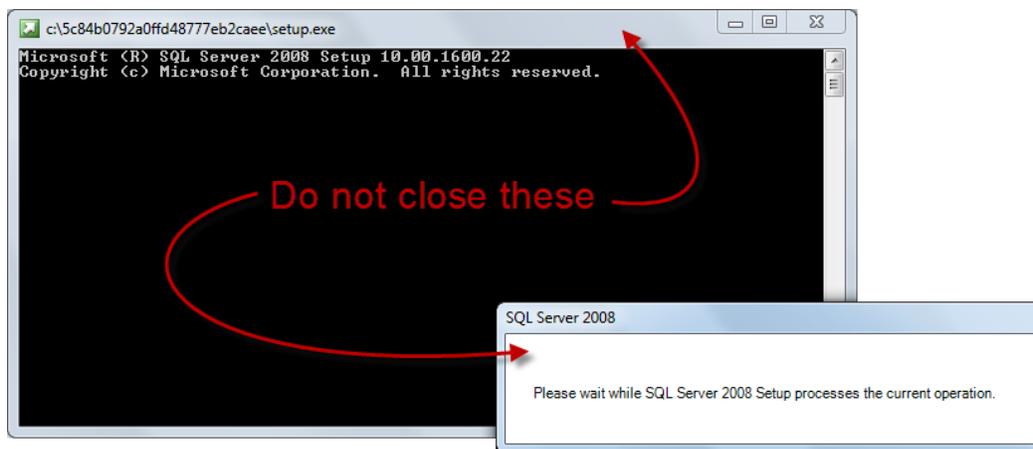

8. After several more screens, "Welcome to the InstallShield Wizard for BS&A SQL 2008" appears. Click [Next >].
9. The "Database Server" screen appears and defaults to the proper configuration; please do not change it:
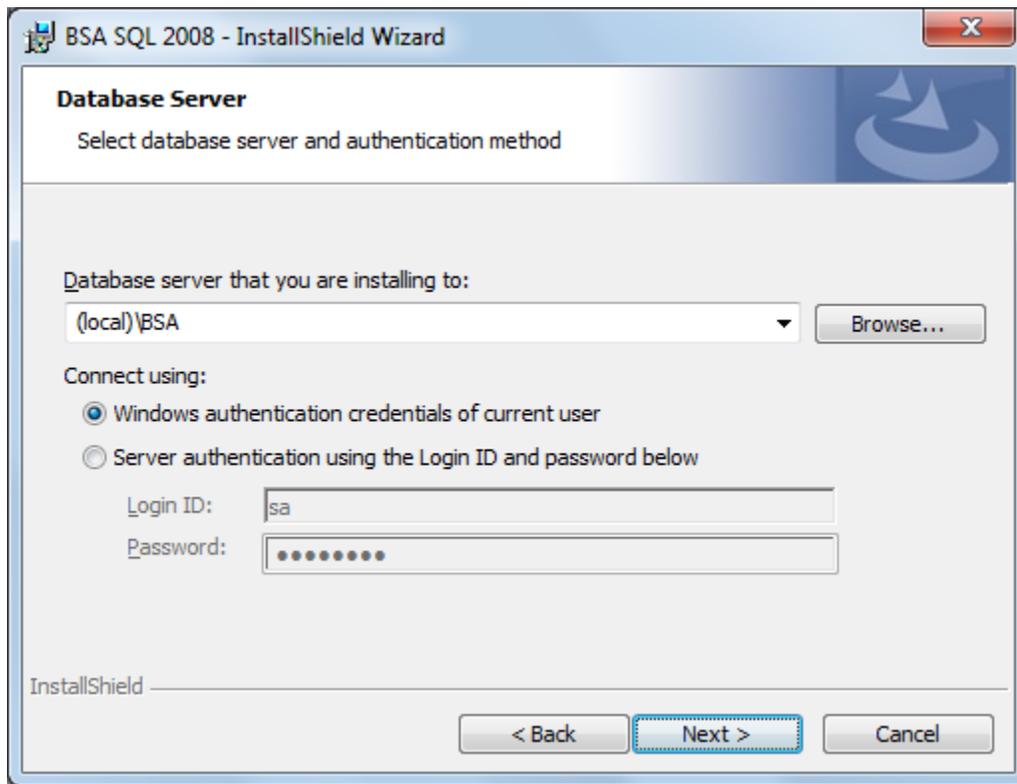

10. Click [Next >].

11. The "Ready to Install the Program" screen appears. Click [Install].

12. The "InstallShield Wizard Completed" screen appears. Click [Finish].

13. Move on to "Install the White Program CD".

Install the White Program CD

1. Insert the white Program CD. The BS&A Software Installation menu appears:
2. Click the program you are installing.

    i. If the selected program is the first one being installed on the machine, you will receive the following screen:
InstallShield Wizard

BSA   .Net requires the following items to be installed on your computer. Click Install to begin installing these requirements.

Status	Requirement
Pending	BSA Sql v10 Native Client

[Install]   [Cancel]

    ii. Click [Install].

3. The "Welcome to the InstallShield Wizard for BSA [program name]" screen appears. Click [Next >].

4. The "Destination Folder" screen appears. Click [Next >].

5. The "Ready to Install the Program" screen appears. Click [Install].

6. When the program is finished installing, you are presented with the "InstallShield Wizard Completed" screen:
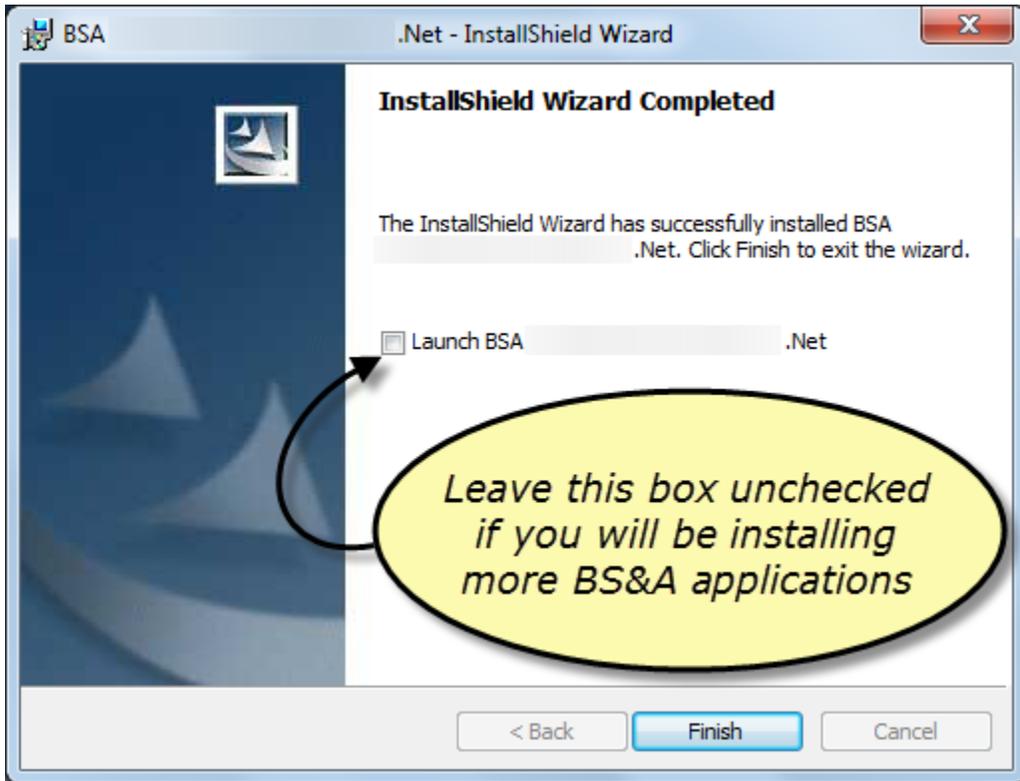

7. Click .

8. When you return to the menu, install any remaining programs.

9. When you return to the menu, click **Pervasive to Dotnet Interface** (this will display "Assessing" or "General Ledger" in parentheses, depending on your menu) and follow the screens (there are three: "Next"; "Install"; Finish"). This allows your Pervasive programs (Assessing, Tax, Building) to interface with GL .NET, AP .NET, and MR .NET (instructions are in the appropriate User Manuals).

   Please note: the "Pervasive to Dotnet Interface" will need to be installed on all machines* that have a Pervasive version of a BS&A program. For example, if your unit has set aside a PC for the Pervasive version of BS&A Building Department.

   *The "Pervasive to Dotnet Interface" will not run on Windows 2000.

10. Click to close the menu.

11. Proceed with the instructions immediately following. You will be repeating these instructions for each program installed on the machine.

   i. Open one of the BS&A programs.

   ii. Login as **BSA** (no password). The program opens to the Examples database.

   iii. Repeat for each program you installed on this machine.
